

# Why Ovis over other suitcases?

## *Ovis is unique*

Ovis is capable of not only being able to “see” as we do, but comprehend what it is seeing. Easily stay by your side at all times so you don’t have to be constantly looking over your shoulder just to see your luggage.

Ovis includes a removable battery. With the press of one button, you can pop out the battery, go through security and then pop it in and continue enjoying your hands-free luggage.

## *Ovis is well-structured*

Ovis’ large interior volume of 34L can easily hold enough items for a whole week trip. With durable yet lightweight material, Ovis makes your travel lite and smart.

Ovis provides you with the greatest efficiency and performance with the premium material that is both durable and lightweight. This allow Ovis to travel on several terrains and have its waterproof feature

## *Ovis is the future*

The favorited feature of Ovis is its capability to charge any and all of your devices on the go. Free yourself from searching for outlets with just a one cable and a power pack!

Ovis is able to track the weight in real-time by a system of complex mathematical equations relating to how hard the motor is working, and how far Ovis has traveled. This can simplify life beyond belief when you are packing so you don’t over-pack or worry about under-packing.

By simply grabbing the handle, you cut all motor power and engage manual mode. When Ovis is switched to manual mode, all four wheels become omnidirectional, allowing a smooth roll on the ground and a buttery smooth luggage drag.

Equipped with GPS and 3G technology, and presented as a cut-resistant luggage tag, the location tracker of Ovis provides you with real-time monitoring and tracking of your belongings – anytime & anywhere.\*

\*GPS sold separately or in a bundle

# Usage information

## *How will Ovis perform in crowded places?*

Ovis utilizes computer vision technology to combine different sensors’ data, precisely following the owner and avoiding obstacles, even in crowded places. However, it is recommended to switch to manual mode under extremely crowded scenarios.

## *What is the battery life?*

When fully charged, the battery will last you two round trips ( Ovis drives itself for 20km per charge).

## *How to charge Ovis? How long till its fully charged?*

Ovis can be charged directly through the cable. You can also remove the battery to charge it separately. The battery can be fully charged in less than 4 hours.

## *Can Ovis travel uphill/ downhill?*

Yes. Ovis is equipped with two precise and powerful motors, sustaining smooth travel on slopes up to an 8° gradient.

## *Is Ovis allowed on an airplane?*

The dimensions of Ovis (15 in\*8.7 in\* 21.6 in) is compatible with airline regulations for carry-ons; The removable 96 wh battery also meets IATA standards for carry-ons.

## Specifications

Wheels: 4  
Max speed: 10km/h  
USB ports: 2  
Weight: <4.5kg  
Volume: 34L  
Materials: PP+Carbon Fiber

Battery type: Lithium-ion  
Rated power: 96Wh  
USB output: 5V  
Battery net weight: 500g  
Operation temperature: -10 to 50°C  
Power adapter voltage: 24V/5V  
Power adapter current: 2A/1A

## Items Included

Ovis \* 1

Cover for Ovis \* 1

Ovis SmartBand \* 1

Ovis Battery \* 1

USB Charger \* 1

Adapter \* 1
