Ovis

1st AI-Powered Suitcase Following by Side

Luggage

-It integrates groundbreaking proprietary computer vision technology, Visual Simultaneous Location And Mapping and artificial neural network algorithms developed by ForwardX, so that it can follow autonomously side-by-side of you.

- Built-in power bank keeps your phone fully-charged all the time
- Anti-lost alarm + location tracker doubles up the security
- Computer Vision algorithms enable Ovis automatically follow from side and avoid obstacles
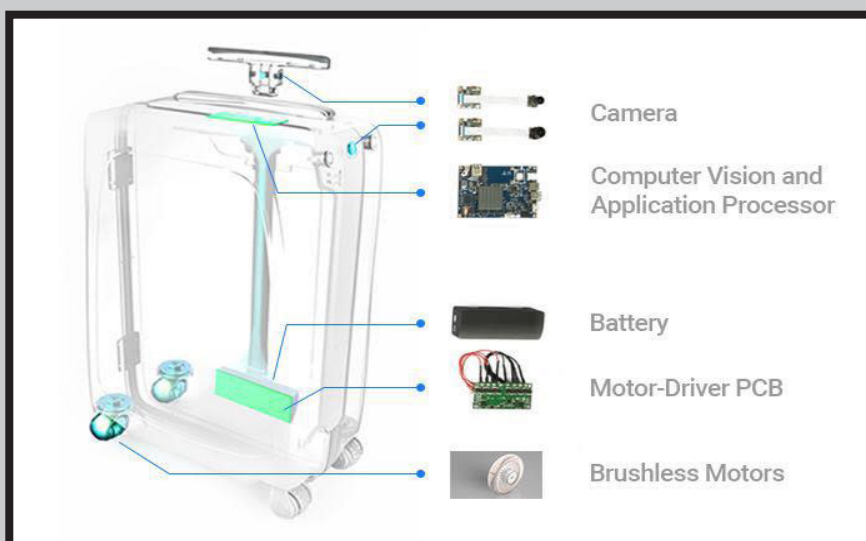

ForwardX Robotics

San Jose, United States

Project Owner

- Side-follow & Obstacle avoidance
- Removable battery
- Large interior space
- Highly durable, light weight, waterproof
- Charge on-the-go
- Weight sensor
- "Anti-lost" smart alarm

Camera

Computer Vision and Application Processor

Battery

Motor-Driver PCB

Brushless Motors
